

ECHS FRAUD ANALYTICS

Identity Fraud & Duplicate Claim Detection Analysis

COMPREHENSIVE REPORT — FY 2021-2026 EDITION (LAST 5 YEARS)

CLASSIFICATION	PERIOD	RECORDS SCANNED	PATTERNS RUN	CASES FLAGGED
RESTRICTED	FY 2021-26	26M+	6 Patterns	7,575,093

IIT KANPUR — Data Analytics & Fraud Intelligence Division

9 June 2026 | Ex-Servicemen Contributory Health Scheme (ECHS)

EXECUTIVE SUMMARY

This report presents findings from identity and claims fraud analytics conducted on the ECHS database covering the five-year period FY 2021–2026. Six independent fraud patterns were applied across **26+ million claim records** to identify duplicate identifiers, simultaneous admissions, bill resubmission, mobile fraud rings, Aadhaar (UID) duplication, and statistical over-utilisation outliers.

TOTAL CASES FLAGGED	TOTAL EXPOSURE	PATTERNS W/ FINDINGS	ANALYSIS PERIOD
7,575,093	₹48962.72 Cr	6	5 Yrs
across 6 fraud patterns	estimated financial risk	of 6 patterns	FY 2021–2026

SIX FRAUD PATTERNS — SUMMARY

#	Pattern	What It Detects	Cases Flagged
1	Duplicate Card IDs (Card Sharing)	Multiple unique beneficiaries sharing the same card physically	156 true fraud + 1,015 typos + 8 op mistakes
2	Simultaneous Admissions	Identifies simultaneous overlapping records — physical impossibility indicating ghost entries	6,577,520
3	Duplicate Bill Resubmission	Duplicate invoice resubmission — direct double-billing indicators	250,090
4	Mobile Number Rings	Agent coordination rings — multiple disparate accounts managed by single contact	177,291 real + 483 dummy
5	UID (Aadhaar) Duplication	Biometric or unique identifier duplication — synthetic identity creation	82,930
6	High Frequency Claims	Statistical over-utilisation outliers (Q3+1.5×IQR) — extreme frequency usage	486,083

IMMEDIATE RECOMMENDED ACTIONS

- Freeze all ECHS cards sharing a duplicate card number** (156 true fraud cases) — block further claims until physical verification confirms the legitimate cardholder. Patch hospital PMS to reject dummy card texts (8 cases).
- Initiate field audit of all simultaneous admission pairs** (6,577,520 cases) — cross-reference hospital admission registers against ECHS claim dates to identify ghost patients.
- Reject all duplicate bill number resubmissions** (250,090 cases) — implement system-level bill number uniqueness enforcement to prevent re-entry.
- Investigate mobile number rings** (177,291 real rings) — a single mobile coordinating 5+ cards indicates a fraud agent; de-register the mobile from non-family cards.
- Audit all UID duplication cases** (82,930 UIDs) — each Aadhaar must map to exactly one identity; escalate duplicates to UIDAI for verification and FIR filing.
- Pre-auth review for high-frequency claimants** (486,083 beneficiaries above 13 claims) — require clinical justification for further admissions.

PATTERN 1

Duplicate ECHS Card Analysis
(Multiple Unique Beneficiaries per Card)

DUPLICATE CARD IDS — IDENTITY FRAUD & SYSTEM MISUSE

Description: Each ECHS card is issued to one individual only. We detected physical card numbers being shared across completely distinct service numbers and beneficiary names. This pattern has been broken down into three sub-categories:

- **True Identity Fraud (156 cases):** Completely different people (different root service numbers AND different names) using the same card.
- **Operator Mistakes (8 cases):** Hospital staff bypassing the system by typing dummy text like '01' or 'Card not handed over' into the Card ID field.
- **Ghost Patients (17 cases):** A severe system vulnerability where 17 service numbers using dummy card text have **never** presented a real ECHS card, yet ₹3.16 L was successfully approved and paid by UTI without identity verification.
- **Hospital Typos (1,015 cases):** Same person, but hospital staff typed the service number differently across claims.

Table 1.1a — True Identity Fraud (Top 10 by Exposure)

Table 1.1b — Operator Misuse (Top 5 Placeholder Texts)

Dummy Card Text	Svc #s	Beneficiary Names	Claims	Hospitals	Total Exposure
Card not hande	535	ABHAY RANJAN KUMAR, AJAY KUMAR SING...	1017	92	₹1.19 Cr
01	13	AITA RAJ SUBBA, AJAY KUMAR AWASTHI,...	14	Lebong, Etawah	₹15.13 L
011	5	KUL PRASAD GURUNG, KUSANG YHAPA, PH...	5	Lebong	₹4.07 L
0000	45	AMAR SINGH, AMARJEET SINGH, ASHOK K...	51	Ambala	₹2.49 L
02	6	AWADHESH KUMAR VERMA, BALVIR SINGH,...	6	Lebong, UNNAO, Etawah	₹1.47 L

Key Findings

- True Fraud:** The cases in Table 1.1a represent undeniable physical card sharing. Two completely unrelated veterans (different root service numbers) are using the same physical card to claim treatments.
- System Loopholes:** Table 1.1b shows that hospital staff are bypassing security by typing "Card not handed over" or similar placeholder strings. One of these strings allowed 535 different people to receive treatment.

PATTERN 2

Cross-Hospital Admission Overlap
(Gap ≤ 7 Days, FY 2021–26)

SIMULTANEOUS ADMISSIONS — PHYSICAL IMPOSSIBILITY

Description: A beneficiary cannot be physically admitted to two different hospitals at the same time or within an impossibly short gap. This pattern identifies claim pairs from the same service number where admissions at different hospitals overlap or are separated by ≤7 days — hospital hopping to claim two separate inpatient episodes for what was a single medical event, or ghost billing where the second admission never occurred.

6,577,520 admission pairs detected with gap ≤ 7 days. Top 15 by exposure shown.

Table 2.1 — Simultaneous/Near-Simultaneous Admissions (Top 15 by Exposure)

PARMOD	14837575K	METRO HEART INSTITUTE - FARI Delhi, Delhi	Faridabad Delhi, Delhi	2024-05-28	2024-07-23	10	₹52.54 L

Key Findings

- Gap/Overlap Days:** Negative values indicate a true simultaneous overlap — the beneficiary was admitted to Hospital 2 before being discharged from Hospital 1. Zero = same-day discharge and admission. Both are physical impossibilities for genuine inpatient care.

Cases where Hospital 2 name shows as a short code (e.g. "Rohtak", "Lodhi Road") indicate ECHS polyclinics — referral-chain fraud where a polyclinic and a private hospital both file claims for the same episode of care.

PATTERN 3

Bill/Invoice Number Resubmission
(Excluding NA / Blank)

DUPLICATE BILL NUMBERS — RESUBMISSION FRAUD

Description: Each hospital bill or invoice carries a unique number. If the exact same bill number is submitted under multiple ECHS claim IDs, it means either: (a) the same bill was physically resubmitted for payment twice, or (b) the bill number field was copied from another claim — both are direct billing fraud. All blank, "NA", and null bill numbers are excluded from this analysis.

250,090 duplicate bill numbers detected. Top 15 by duplicate count shown.

Table 3.1 — Most Resubmitted Bill Numbers (Top 15)

Bill Number	Dup Count	Claims	Hospitals	Beneficiary/Svc #	Total Exposure
202436702, GST	78	78	HARDOI	RAVINDRA NATH PAL	₹95.50 L
305101	2	2	Ara Bhojapur	SURENDRA SINGH	₹88.57 L
221338	2	2	Bangalore (Deactivated)	S ANANDA RAO	₹57.18 L
IPCS24000819	3	3	Vijayawada	SUNKAVALLI SREE RAMMOHAN	₹57.00 L
1003047823	2	2	Quilon (Kollam)	MANOJ V	₹54.70 L
MILL - ICS - 63388	34	34	LUCKNOW	AWDH NARESH MISRA	₹51.12 L
GHIPBL/ 25091060	2	2	Chandigarh	JOGA SINGH	₹50.61 L
4085	3	3	Perinthelmanna	ZACHARIAS P C	₹49.80 L
BILL ATTACHED	178	94	Delhi Cantt (BHDC), Gurgaon (Dhundaheera), Gurgaon (Soha...	RAJENDER KUMAR, SHRI KRISHAN GARG, JAI BHAGWAN +37...	₹46.69 L
9197	2	2	Palampur (RC Yol)	OM PRAKASH	₹46.08 L
MHIC177101	3	3	Chandimandir	MC DOGRA, OM PRAKASH LAMBA	₹44.23 L
IPCS23001710	2	2	Secunderabad Main	TARKESHWAR SINGH	₹42.00 L
3002/Bill/ECHS	26	26	Dehradun	BHIM SINGH NEGI, POORAN SINGH ASWAL, KUNWAR SINGH ...	₹41.61 L
SUMMARY ATTACHED	29	29	Kanpur Nagar	HARISH CHANDRA VARMA	₹39.81 L
PTB/800495	2	2	Pune	TUKARAM BABAN GAWARE	₹39.33 L

Key Findings

- Dup Count** = number of distinct ECHS claims carrying the same bill string. A count of 2 = one resubmission; counts of 5+ indicate systematic reuse of the same document across many claims — a template-based billing fraud operation.
- Bill number duplicates appearing across multiple hospitals (Hospitals column > 1) are particularly severe: the same physical bill cannot have been issued by two separate facilities, confirming fabrication of the invoice document itself.

PATTERN 4

MOBILE NUMBER RINGS — COORDINATED FRAUD AGENT NETWORK

Mobile Coordination Network
(5+ Cards per Mobile, FY 2021–26)

Description: An ECHS mobile number is used for claim communication and OTP verification. Legitimate sharing within a family (one ex-serviceman + dependents) produces at most 3–4 cards on one number. When a single mobile is linked to 5+ cards belonging to different service numbers, it indicates a **fraud agent** operating as the contact point for multiple unrelated identities — filing claims on behalf of ghost beneficiaries. **483 dummy numbers** (all-zero, repeating digits) were excluded and reported separately below.

177,291 real mobile rings detected. Top 15 by total exposure shown.

Table 4.1 — Top Mobile Number Rings (Real Numbers, Top 15 by Exposure)

Mobile Number	Cards	Svc Numbers	Claims	Hospitals	Total Exposure
9599752407	6	2	204	18	₹2.99 Cr

9779829929	6	1	83	8	₹2.42 Cr
9466230981	5	2	162	14	₹2.36 Cr
8851313282	15	1	164	14	₹2.34 Cr
9540367061	5	1	163	8	₹2.34 Cr
9467108388	8	3	122	12	₹2.34 Cr

Table 4.2 — Dummy/Invalid Mobile Numbers (Excluded from Main Analysis)

Mobile Number	Cards	Claims	Total Exposure
0000000000	2649	4445	₹9.97 Cr
9999999999	642	1303	₹1.58 Cr
9999156421	5	49	₹1.17 Cr
9999265464	5	544	₹70.01 L

Mobile Number	Cards	Claims	Total Exposure
9999150933	5	41	₹65.91 L
9999971626	10	358	₹60.05 L
1234567890	186	840	₹58.01 L
9999762583	8	117	₹53.25 L
9999390379	7	132	₹52.68 L
9999680725	5	11	₹51.57 L

Key Findings

- Cards** = distinct ECHS health cards registered under this single mobile. Fraud agents maintain one phone number as their operational contact across all ghost identities they manage — allowing them to receive OTPs, discharge summaries, and claim status alerts centrally.
- Dummy numbers** (Table 4.2) represent cases where the mobile field was filled with placeholder data (000000, 111111, etc.) — indicating the beneficiary has no real mobile on file, making contact and verification impossible.

PATTERN 5

Aadhaar UID Cross-Linkage Analysis
(Dummy UIDs Excluded)

UID DUPLICATION — SYNTHETIC IDENTITY FRAUD

Description: The 12-digit Aadhaar UID is a biometric-linked national identifier — exactly one UID per individual, guaranteed by UIDAI. If the same UID appears registered under multiple ECHS service numbers, it means: (a) one person's identity is being used by another (**identity theft**), or (b) a single UID has been bulk-registered under fabricated service numbers to generate fictitious beneficiaries (**synthetic identity fraud**). Known dummy UIDs (all-zero, all-nine, sequential) are excluded. All 12-digit UIDs masked as XXXX****XXXX in the report.

82,930 UIDs found linked to multiple service numbers. Top 15 by exposure shown.

Table 5.1 — UID Duplication Cases (Top 15 by Service Number Count)

UID (masked)	Svc #s	Claims	Hospitals	Locations	Total Exposure
7561****7493	60	66	Delhi Cantt (BHDC), KALRA HOSPITAL SRCNC PVT LTD - KIRTI NAG...	Delhi-Delhi	₹1.37 Cr
9456****4987	98	111	KALRA HOSPITAL SRCNC PVT LTD - KIRTI NAGAR	Delhi-Delhi	₹1.29 Cr
7379****6557	2	49	Bhubaneswar (RC Ranchi), Bhubaneswar (RC Bhubneshwar)	Bhubaneswar-Rajasthan Ranchi-Odis	₹1.19 Cr
9429****0803	204	442	MITTAL HEALTHCARE, TATA MEMORIAL CENTRE (SANGRUR), HOMI BHAB...	Ambala-Punjab Chandimandir-Chandi	₹1.16 Cr
8380****7991	44	59	6	Delhi-Delhi Delhi 2-Delhi Hisar	₹1.05 Cr
6757****9581	9	37	MAX SUPER SPECIALITY HOSPITAL - SHALIMAR BAGH, KALRA HOSPITA...	Delhi-Delhi	₹1.00 Cr
2078****4437	3	81	Noida	Delhi 2-Delhi	₹95.51 L
8697****3543	2	13	METRO HOSPITAL & CANCER INSTITUTE - PREET VIHAR	Delhi 2-Delhi	₹85.52 L
2190****3566	264	517	Bengdubi	Kolkata-West Bengal	₹85.35 L
5386****5680	2	40	18	Delhi-Delhi Delhi 2-Delhi	₹82.21 L
7852****1077	2	8	5	Allahabad-Uttar Pradesh Delhi 2-D	₹80.85 L
9289****1453	26	34	SHAKUNTLA NURSING HOME & HOSPITAL, KALRA HOSPITAL SRCNC PVT ...	Delhi-Delhi	₹78.84 L
2360****8882	42	54	HCG CANCER CENTRE	Ahmedabad-Gujarat	₹78.76 L
9840****5751	31	40	ORTHO PLUS HOSPITAL, NKS HOSPITAL (A UNIT OF BRAM HEALTH CAR...	Delhi-Delhi	₹77.34 L
8185****2562	32	39	PARK HOSPITAL - FARIDABAD, NKS HOSPITAL (A UNIT OF BRAM HEAL...	Delhi-Delhi	₹76.99 L

Key Findings

Svc #s = count of distinct military service numbers sharing this UID. Each UID should map to exactly **one** individual. Even two service numbers sharing one UID is anomalous — it means one person's biometric is funding two ECHS accounts.

UID duplication cases involving 3+ service numbers and multiple geographic locations indicate a **large-scale synthetic identity ring** — a single Aadhaar is the seed identity for an entire cluster of fabricated ECHS accounts. These must be escalated to UIDAI and ECHS Directorate.

PATTERN 6

Statistical Outlier Detection

(Q3 + 1.5×IQR Threshold: 13 claims)

HIGH FREQUENCY CLAIMS — OVER-UTILISATION FRAUD

Description: The fraud threshold for this pattern was **calculated dynamically** using the Tukey Fence method — a standard statistical outlier detection technique (John Tukey, 1977) applied to the actual claim distribution of all **4.69 million ECHS beneficiaries** over 5 years. No fixed or arbitrary number was assumed.

How the threshold was derived — step by step:

- **Median = 2 claims** — The midpoint of all beneficiaries. Half of India's ECHS users made fewer than 2 inpatient claims in 5 years. This is the realistic baseline of a typical ex-serviceman's medical usage.
- **Q1 = 1 claim** — The bottom 25% of all beneficiaries made just 1 claim over 5 years.
- **Q3 = 6 claims** — 75% of all beneficiaries made 6 or fewer claims over 5 years. Only the top 25% exceeded this.
- **IQR = Q3 – Q1 = 5** — The Interquartile Range is the natural spread covering the "middle 50%" of users. It measures how wide the normal zone of variation is.
- **Tukey Fence = Q3 + 1.5 × IQR = 6 + 7.5 = 13.5 → 13 claims** — Any beneficiary above this boundary is classified as a statistical outlier. In a normal distribution this represents less than 0.1% probability of occurring by chance — meaning it is almost certainly not explained by age, illness, or any legitimate medical need alone.

In plain terms: **if 99.9% of ECHS users manage their healthcare in 13 or fewer claims over 5 years, anyone with 14+ claims is not a heavier user — they are an anomaly that demands investigation.** This indicates planned over-utilisation, ghost visit billing, or active collusion with a hospital to generate fraudulent claim volume.

486,083 beneficiaries exceeded the 13-claim threshold. Top 15 by total exposure shown.

Table 6.1 — High Frequency Claimants Above Threshold (Top 15 by Exposure)

Service #	Beneficiary	# Claims	Avg Claim	Hospitals	Total Exposure

JC135912M	KASHMIR SINGH	66	₹4.68 L	CAPITOL HOSPITAL, FORTIS ESCORTS HOSPITAL (A UNIT OF FHL & I...	₹3.09 Cr

Service #	Beneficiary	# Claims	Avg Claim	Hospitals	Total Exposure
14566017M	KRISHAN PAL YADAV	100	₹2.97 L	MAX SMART SUPER SPECIALITY HOSPITAL - SAKET, MAX SMART SUPER...	₹2.94 Cr
3378042A	PARAS RAM	65	₹4.66 L	NARAYANA VAISHNO DEVI SPECIALITY HOSPITALS PRIVATE, RAKSHA K...	₹2.94 Cr
4457835A	RAGHBIR SINGH	112	₹2.59 L	AMAR HOSPITAL - PATIALA, SIMRITA NURSING HOME, NEELAM HEALTH...	₹2.87 Cr

Key Findings

- The statistical baseline (median = 2 claims over 5 years) reflects the typical ECHS beneficiary pattern. A beneficiary with 13+ claims is 6× above the median. Beneficiaries with 30+ claims over 5 years (6 per year) warrant immediate clinical audit — at that frequency, inpatient claims can no longer be explained by age or chronic illness alone.
- High-frequency claimants concentrated at a **single hospital** (Hospitals = 1) are the most suspicious: genuine chronic illness patients typically see multiple specialists across different facilities. One hospital + high frequency = hospital-patient collusion for ghost billing.

CONSOLIDATED SUMMARY

All findings are based on structured database analysis and must be corroborated with physical audit records before enforcement action is taken.

Pattern	Fraud Signal	Cases Flagged	Exposure
1	Duplicate Card IDs (Card Sharing)	156 real + 1,015 typo + 8 dummy	₹30.07 Cr
2	Simultaneous Admissions (Gap ≤ 7 days)	6,577,520	₹18257.26 Cr
3	Duplicate Bill Number Resubmission	250,090	₹932.03 Cr
4	Mobile Number Rings (5+ cards)	177,291 real + 483 dummy	₹11063.98 Cr
5	UID (Aadhaar) Duplication	82,930	₹1818.60 Cr
6	High Frequency Claims (≥13 claims)	486,083	₹16860.78 Cr
TOTAL		7,575,093	₹48962.72 Cr

Prepared by IIT Kanpur — Data Analytics & Fraud Intelligence Division | 9 June 2026

All findings are based on structured database analysis and must be corroborated with physical audit records before enforcement action.
