EXECUTIVE SUMMARY

This report investigates hospital specialty misuse — cases where facilities bill for services outside their designated category, and anomalous deduction patterns across hospitals. Five primary fraud patterns are confirmed.

FIVE FRAUD PATTERNS — SUMMARY

#	Pattern	What It Detects	Cases Flagged
1	Specialty Category Billing Fraud	Type-3 facilities (dental clinics and diagnostic labs) billing IPD admissions.	22 facilities
2	NABH vs Non-NABH Divergence	NABH-accredited facilities show consistently lower deduction rates, but some anomalies exist.	50 anomalous
3	Out of Scope Empanelment	Hospitals billing for IPD services when they are NOT empaneled for IPD.	2,518 facilities
4	Year-over-Year Billing Spike	Sudden 100%+ annual growth in claim amount indicating deliberate strategy change.	1,677 facilities
5	High-Value Claims at Low-Tier	Type-3 facilities billing abnormally high individual claim amounts (over ₹1L).	17 facilities

IMMEDIATE RECOMMENDED ACTIONS

- Audit all Type-3 IPD Billings** (22 cases) — Deny all IPD claims from dental clinics unless explicitly authorized.
- Investigate anomalous NABH hospitals** (50 cases) — A high deduction rate despite NABH status suggests potential bill padding.
- Block out-of-scope empanelment billing** (2,518 facilities) — Enforce system-level blocks preventing non-IPD hospitals from submitting IPD bills.
- Review YoY billing spike** (1,677 facilities) — Request clinical justification for hospital billing that has doubled year-over-year.
- Flag high-value Type-3 claims** (17 facilities) — Require manual pre-authorization for any Type-3 claim exceeding ₹50k.

PATTERN 1

SPECIALTY CATEGORY BILLING FRAUD (IPD)

Type-3 Facilities (Dental/Diag)

Description: Type-3 facilities (dental clinics and diagnostic laboratories) are billing inpatient (IPD) admissions — a service category they are not licensed or equipped to provide. These facilities should only handle outpatient procedures. **All such IPD claims represent severe policy violations.**

Total Facilities Flagged: 22

Key Findings

- IPD Claims at Dental Clinics:

Dental clinics and diagnostic centers are solely empaneled for OPD (Outpatient Department) procedures. Billing for IPD admissions from a Type-3 facility implies fraudulent coding or systemic misuse of the hospital classification.
- Facilities flagged here must be immediately audited to ensure they are not admitting patients overnight in unlicensed premises.

PATTERN 2

NABH Divergence Anomaly
(>15% Deduction in NABH)

NABH ACCREDITATION & HIGH DEDUCTION ANOMALIES

Description: NABH-accredited facilities are expected to adhere to higher billing standards, typically resulting in lower deduction rates (the difference between claimed and approved amounts). When an NABH hospital consistently suffers extremely high deductions (over 15%), it indicates chronic over-billing, unbundled charging, or billing for non-entitled items despite their accreditation.

System-wide Context: There are **155** NABH-accredited hospitals and **3,809** Non-NABH hospitals currently active in the dataset.

Total Anomalous Hospitals: 50

METRO HOSPITAL & HEART INSTITU	H	NOIDA	38189	₹269.22 Cr	₹201.26 Cr	25.25%

Key Findings

Ded. % (Deduction Percentage): A high deduction rate in an NABH hospital contradicts the expected billing quality of an accredited facility. These hospitals may be utilizing their NABH status to attract ECHS patients while systematically inflating bills to maximize approved payouts.

Military Hospitals (Type M) often show very high deductions, but they are not the focus here; these are private empanelled NABH facilities exhibiting predatory billing behaviors.

PATTERN 3

SERVICES OUTSIDE EMPANELED SCOPE

Services vs Claims
(IPD Billing Without Any Empanelment)

Description: Hospitals must be registered in the ECHS empanelment system (empanel_hospital_service) to bill for any service. This pattern identifies hospitals that are actively filing **Inpatient (IPD) claims** but have **zero entries** in the empanelment registry — meaning they possess no formal ECHS authorisation for any service whatsoever.

Important Note: The ECHS empanelment registry tracks clinical specialties (e.g. General Medicine, Cardiology, Orthopedics) rather than care modes (IPD/OPD). Out of **3,585** hospitals filing IPD claims, **1,067** do have empanelment entries (with clinical specialty registrations), while **2,518** have absolutely no empanelment record and are the primary fraud concern flagged below.

Total Facilities Flagged (No Empanelment): 2,518

Table 3.1 — IPD Claims from Hospitals with Zero Empanelment (Top 15 by Claimed Amount)

JAYPEE HEALTHCARE LIMITED	H	NOIDA	18957	₹172.72 Cr	No Empanelment Record

Key Findings

- Zero Empanelment = Maximum Risk:** These 2,518 hospitals have no entry in the empanel_hospital_service table at all. They are billing ECHS for inpatient services without any formal authorisation — this is the most severe compliance violation as there is no contract record to verify their legitimacy.
- Registry Limitation:** The remaining 1,067 hospitals (not shown) do appear in the empanelment registry with clinical specialties but the registry does not explicitly track "IPD" as a service category. These hospitals require a separate empanelment-scope audit but are not flagged here to avoid false positives from the registry's design limitation.
- Recommended Action:** ECHS processing centers should implement hard-blocks to automatically reject claims from hospitals with zero empanelment records. All 2,518 flagged facilities must undergo immediate site verification before any further claims are processed.

PATTERN 4

YoY Financial Trend
(>100% Annual Amount Growth)

YEAR-OVER-YEAR BILLING SPIKE BY HOSPITAL

Description: Detects hospitals demonstrating a sudden **100%+ annual growth** in claim amounts without a corresponding growth in their registered patient base or empanelled capacity. A cliff-edge spike of this magnitude indicates a deliberate change in aggressive billing strategies rather than organic demographic growth.

Total Facilities Flagged: **1,677**

THYROCARE TECHNOLOGIES LTD	BANGALORE	2024	2025	₹22,000	₹10.04 L	+3603.6%

Key Findings

- Amt Growth %:** Hospitals doubling their ECHS revenue in a single year must be audited. This often correlates with a new fraud ring operation, hiring of aggressive billing agents, or systematic upcoding of procedures.
- Discrepancies where Amount Growth far exceeds Claims Growth indicate the hospital has started charging significantly more per patient (inflation of severity, unbundling).

PATTERN 5

Type-3 Facilities
(Extreme High-Value Claims >₹1L)

HIGH-VALUE CLAIMS AT LOW-TIER FACILITIES

Description: Small or specialist-only hospitals (Type 3: Dental, Diagnostic, Polyclinics) billing individual claim amounts that exceed their clinical capabilities. A dental clinic billing ₹50,000+ for a single admission is a strong indicator of fabricated bills or incorrect hospital classification.

Detection Thresholds Applied: Flagged hospitals are Type-3 facilities where: (a) at least **3 individual claims each exceed ₹50,000**, and (b) any single claim reaches up to or beyond **₹1,00,000**. These limits reflect the maximum plausible billing capacity for a dental clinic or diagnostic lab.

Total Facilities Flagged: 17

Table 5.1 — Low-Tier Hospitals with High-Value Claims (Top 15)

MUSKAAN DENTALS (A UNIT OF PEA	D	GURUGRAM	3	₹1.47 L	₹2.76 L
ORO DENTAL HEALTH CARE CENTRE	D	PATNA	3	₹96,000	₹2.36 L

Key Findings

- Max Single Claim:** The maximum amount billed for a single patient episode. For Type-3 facilities, claims exceeding ₹50,000 are extremely rare and highly anomalous.
- Facilities flagged here must provide detailed clinical justification for these high-value bills, as their infrastructure typically does not support procedures of this cost magnitude.

CONSOLIDATED SUMMARY
